

November 2012

North Dakota Bakken oil production by company

Derived from the November 2012 Oil & Gas Production Report published by the North Dakota State Industrial Commission, Department of Minerals, Oil & Gas Division. Note this is the oil produced by wells operated by these companies; it does not identify the percentage of Bakken petroleum system oil (including Three Forks) that is owned by the company or its partners, so it may differ from what the company reports. Also, the daily average was derived from dividing the total production by the number of days in November, versus the number of days the well was actually producing. There are a few wells that did not produce for the entire month.

Legend:
Company
Field — Pool — County — Barrels of oil
Daily average barrels

Also note: Burlington Resources Oil & Gas Company, LP is owned by Conoco Phillips; Brigham Oil & Gas, L.P. is owned by Statoil; and XTO Energy, Inc. is owned by ExxonMobil, operating its own acreage in the Bakken as well as the assets of Denbury Onshore, LLC, which ExxonMobil has also acquired. Samson Resources Company is now owned by KKR & Co. The operator names used in this chart are exactly as they appear in State of North Dakota Oil & Gas Division records, but some of the other companies and/or their Bakken assets might also have been acquired by others.
